2 WORK HISTORY

Full Stack Web Developer / Ceder Group

February 1, 2021

January 2, 2022

The Ceder Group is a group of young and energetic investors who have come together with the sole aim of pioneering challenging moves in both the fashion industry and the agricultural sector. This project that I and two other developers worked on with them is called - CARD COMMERCE. which is an e-commerce platform for fashion designers and handmade products for a specific group of people that is not well catered for by other e-commerce platforms. Handled all the client-side validations, slide show, hide and show controls, dropdown menus, and tab navigation using react. Designed the Web application layout and forms using HTML, CSS, and JavaScript Created modular CSS using LESS for reusability and easy to read code Responsible for transforming design mock-ups to W3C standards compliant HTML pages using HTML, CSS and Bootstrap Implemented various screens for the front end using React.js and used various predefined components from NPM (Node Package Manager) Worked in using React.js components, Forms, Events, Keys, Router and Flux concept Used react as a framework to create a Single Page Application (SPA) that can bind data to specific views and synchronize data with the server Built all the backend activities in a node js environment using express framework Implemented a Node.js server to manage authentication

Freelance Web Developer / 9ja Blinks •

January 1, 2019

November 1, 2019

9ja blinks is a Nigerian-based online blogging platform, and its main mission is to advertise and popularize Nigerian-based musicians and performers. In 2019 I was employed to help set up the website and package it for hosting. Utilized React.js and React Router in the development of building single page application (SPA) and to consume RESTful web services Implemented React context API for states maintenance and actions dispatch Implemented responsive web design and mobile-friendly design using Bootstrap grid system and CSS media query Was responsible for setting up the website for hosting on Qserver.net JavaScript Python ReactJS Flask Next js HTML CSS Express js Node js Mongo DB Firebase
